All individuals (and businesses) must follow County and State Health Officer orders which are issued under the authority of California law. As a condition of re-opening, current orders +15105043284 require, among other things, local business compliance with state and local industry-specific guidance and submission of self-certification forms. State Statute explicitly provides that Health Officer orders may be enforced by the local sheriff or other peace officers of the County. Violation of the Orders may subject a person or business to criminal or civil penalties, as well as other legal consequences. In particular, any business that violates the Health Officer's orders risks committing negligence per se, may expose itself to civil liability for all damages created by any viral transmission that occurs at their place of business. \*

I read and understand the foregoing.
