

Health and Safety Plan for business under Sarah Fenner, located at 633 South Main Street, inside of Shag Salon.

1. Salon entrance currently has signage printed from Mendocino County website.
2. As the sole employee I will be wearing cloth face mask plus gloves for all appointments, plus a plastic shield face guard for services where the client cannot wear a face mask. Will be mandatory for clients to wear a face mask at all times except for services that require it to be removed. If a client does not have a mask, a disposable one will be provided to them before they can enter.
3. Are no other employees or temp workers.
4. Same
5. Client arrivals will be staggered. Only one client to be worked on at a time. Thorough disinfection of all touched surfaces with barbicide or isopropyl alcohol in between clients.
6. Clients will not be allowed to wait or gather in the front entrance. Will be mandatory for clients to wait outside or in their cars until it's time for their treatment. All post-service actions (rebooking and payment) will be handled with client still in the treatment room so as to reduce exposure to other clients in the salon.
7. The 6' distancing requirement will be followed at all times unless treatment services require less.
8. All payment methods will be accepted with thorough sanitizing of hands and all surfaces touch after the transaction is finished.
9. All touched surfaces will be sanitized with barbicide or isopropyl alcohol in between clients, including doors, counters, pens, and the restroom. All treatment supplies will be sanitized per the usual State Board Guidelines.
10. Facial coverings will be mandatory except during treatments on the lower half of the face.
11. See #9
12. My treatment room is separate from the salon's hair stations and therefore follows the 6' guidelines.
13. All touched surfaces and supplies will be sanitized according to usual guidelines. Disposable supplies will be used in as many areas as possible.
14. N/A
15. N/A
16. N/A
17. Anything that touches the clients skin will be washed and sanitized afterwards. Client will be asked to wear face covering throughout. All tools and touched surfaces will be sanitized.
